Saving Money is Easy: December

Question 1:

You have $14.54 in your credit union account. Last week you made a deposit of $6.11 and today you made a deposit of $7.85. How much do you have saved?

Answer 1:

$14.54
   6.11
+ 7.85
$28.50   You have $28.50 saved. Great job!

Question 2:

You've been busy! You walked Mrs. Johnson's dog 13 times in the past 2 weeks. Each time you walk the dog, Mrs. Johnson pays you 75¢. How much money have you made?

Answer 2:

75¢ is $0.75 in decimal form.

$0.75
x   13
$9.75   You have made $9.75.

Question 3:

Your credit union just paid interest! You had $101.50 in your account, and got a 2% dividend. How much interest did you earn?

Answer 3:

Multiply 2% by the amount of money in your account! 2% in decimal for is .02.

$101.50
x   .02
$2.03   You earned $2.03 in interest!
